

Mukarram Ali

Flutter Developer

Milan, Italy | mukarramappdev@gmail.com | +39 350 883 9309 | github.com/Mukarram-Dev | mukarramappdev.site

Available full-time from 1 December 2026 | Milan (on-site or hybrid) or remote

SUMMARY

Flutter developer who has shipped 6 production apps to the App Store and Google Play since 2023, including a Saudi equipment marketplace with 10K+ Google Play downloads and a B2B construction ordering app. Builds apps end to end: Clean Architecture, Riverpod, REST and Firebase integration, offline-first data, testing and store releases. Completing an MS in FinTech at Politecnico di Milano, with a Flutter escrow-payments app as the thesis project.

SKILLS

Mobile: Flutter, Dart, iOS, Android, Flutter Web, Clean Architecture, MVVM, SOLID

State and navigation: Riverpod, Provider, BLoC/Cubit (working knowledge), go_router

Data and backend: REST APIs, Firebase (Authentication, FCM push notifications), payments, SQLite, Hive, offline sync, Laravel API integration, Supabase, Gemini API

Quality and release: unit, widget and integration testing, debugging, performance tuning, App Store and Google Play releases, Git, GitHub, Postman, Figma, Agile/Scrum

Web: Next.js, React, TypeScript

EXPERIENCE

Flutter Developer, Freelance Client Projects

May 2023 - Present

Independent | Remote from Milan, Italy

- **ReadyMix Deals**, B2B construction materials marketplace ([Google Play](#) | [App Store](#)): built quote-to-order, secure payment, order-status and push-notification flows on a Laravel API with client and factory roles (14 endpoints). Client-reported order time fell from 30 minutes to under 5.
- **Saudi Equipment Marketplace**, contractor-to-supplier rental app ([Google Play](#) | [App Store](#)): 10K+ Google Play downloads. Client-reported time to match a contractor with equipment fell from 3 days to 4 hours.
- **Offline-first IoT farm monitoring app**: real-time irrigation data from 100+ sensors across 12 fields with unreliable connectivity, delivered in 18 weeks.
- Also built a restaurant ordering app (Foodsy / Bombay Kitchen), a telehealth eye-care app and an AI chatbot app on the Google Gemini API.
- Across projects: agreed API contracts, payloads and error states with backend developers; structured apps with Riverpod and Provider on Clean Architecture and go_router; ran unit, widget and integration tests before every release and handled store submission.

Flutter Developer Intern

Dec 2022 - Mar 2023

GamiTron | Lahore, Pakistan

- Built Flutter screens and reusable components, integrated REST endpoints with asynchronous Dart, and fixed UI, API and state defects through code reviews in Agile sprints. Built native Android prototypes in Java.

PROJECTS

FlowShield, MS FinTech thesis project

2026

- Flutter app for protected milestone payments between cross-border freelancers and their clients, settled in stablecoins, with separate client and freelancer dashboards. Thesis defence at Politecnico di Milano on 24 November 2026.

Website Engine, reusable website platform ([live demos](#))

2026

- Next.js, React, TypeScript and Supabase platform with booking, quote-request and staff-admin workflows, seven business presets, and multi-language support including right-to-left.

EDUCATION

International Master in FinTech | Politecnico di Milano | Graduating November 2026

Bachelor's Degree in Computer Science | Superior University, Lahore | 2024 | GPA 3.43/4.0

Languages: English (B2, professional working), Italian (A1, studying) | **Certification:** Google Play Store Listing Certificate, Google Play Academy
